

## **DISCLAIMERS:**

1. I make a diligent effort to accurately describe individual vehicles but do not expressly or implicitly guarantee the accuracy of the description. Information about the vehicle is often provided by the client. I do not certify documentation, authenticity, body repair, mechanical work, titles, odometer readings, matching numbers, VIN, casting numbers or other numbers, etc. The potential for reproduction or alteration of documentation, trim and data tags, and vehicle body and mechanical components exists. I am not responsible for any misrepresentation by the client or owner or errors in information, specifications, statements of history and or repairs, etc.
2. Vehicle components may perform satisfactorily until the moment of failure. Failure may occur suddenly and without warning. I am not liable for failures which may occur after an inspection is completed. By accepting this report, the consumer acknowledges that I cannot be held responsible for any and all alleged vehicle defects, and further, the consumer releases and holds me harmless from any and all further claims on this vehicle. No warranty for this vehicle is implied or given by me.
3. The contents of this report tell you what I found at the time of the inspection. After I leave the vehicle I am not in control of what might occur to the vehicle, nor have control of parts that may be on the vehicle at the time of the inspection, but taken off or switched later.
4. Vehicle appraisals and inspections and the opinions expressed are exactly that, opinions. I provide a visual inspection and report on the vehicle. It is understood I will NOT find everything wrong on a particular vehicle. Additionally, vehicles often have more body filler, rust, and/or repaired areas than can be detected in a limited visual inspection. The inspection report shows the areas of the vehicle visually looked at. The report covers only those areas. It may not be assumed that I inspected anything other than the areas covered by the report. I do not make recommendations on whether to buy a vehicle. Due diligence should be conducted in any further assessment of this vehicle. A buyer makes his or her own decision on whether to buy a vehicle. Buying a vehicle based on my report alone is completely at the consumers' own risk. The report is not a warranty. If you buy a vehicle I have inspected and/or appraised or and you find something wrong with the vehicle after your purchase, I will NOT reimburse you for any repairs, mechanical failures, bodywork, purchase costs, etc.
